

Hlavní parametry

Řada	Masterpact
Typ produktu nebo součásti	Aplikace
Application program desc	Trip fault WFC
Kompatibilní řada	Masterpact MTZ1 jistič Masterpact MTZ2 jistič Masterpact MTZ3 jistič
Popis služby	Allows to log automatically five cycles of phase and neutral currents Sampling period of 512 micro seconds in case of trip of LSI or G protection Records the following status: circuit breaker open/closed/trip and ZSI signals Display one cycle before the fault and 4 cycles after
Service benefits	Help to understand the nature and gravity of the fault (amplitude and duration) Help to understand the potential damage on the installation Support analysis of global behaviour of the circuit breaker in the power system
Správa energie	Diagnostics and maintenance crisis management možnost
